1. Product Overview

1. 产品简介

Darrius.AI (Inflection Hunter) is an AI-assisted investment decision platform developed by Darrius FinTech Inc., a U.S. financial technology company.

Darrius.AI (拐点猎手) 是由美国金融科技公司 Darrius FinTech Inc. 开发的人工智能辅助投资决策平台。

The core philosophy of Darrius.AI is not to predict the market, but to identify critical changes in market and stock structure.

Darrius.AI 的核心理念并不是预测市场，而是识别市场和股票结构的关键变化。

Darrius.AI helps users understand the market through three core technology systems: Inflection Point, Darrius Mutant, and Market Pulse.

Darrius.AI 通过三大核心技术体系帮助用户理解市场：价格拐点 Inflection Point、资金动能 Darrius Mutant 和市场情绪 Market Pulse。

2. Darrius.AI vs. Traditional Quantitative Trading

2. Darrius.AI 与传统量化交易的区别

Traditional quantitative trading commonly relies on factor models, historical backtesting and predefined execution rules. Darrius.AI focuses more on changes in market structure and provides explainable signals to assist users in understanding the market.

传统量化交易通常依赖因子模型、历史回测和预设执行规则。Darrius.AI 更关注市场结构变化，并通过可解释的信号帮助用户理解市场。

3. Three Core Technology Systems

3. 三大核心技术体系

Inflection Point identifies critical nodes where price structure may be changing.

Inflection Point 用于识别价格结构可能发生变化的关键节点。

Darrius Mutant identifies the capital momentum that may be driving price movement.

Darrius Mutant 用于识别推动价格变化的资金动能。

Market Pulse identifies the overall behavioral and sentiment tendency of market participants.

Market Pulse 用于识别市场参与者整体的行为与情绪倾向。

4. Inflection Point Signal System

4. Inflection Point 价格拐点信号系统

eB - Early Buy: early buy alert signal.

eB - Early Buy: 买入预警信号。

B - Buy: confirmed buy signal.

B - Buy: 买入确认信号。

eS - Early Sell: early sell alert signal.

eS - Early Sell: 卖出预警信号。

S - Sell: confirmed sell signal.

S - Sell: 卖出确认信号。

When eB is followed by B, the market may be progressing from an early structural alert to a confirmed bullish structure.

当 eB 之后出现 B 时，市场可能正在从早期结构预警进入看多结构确认阶段。

When eS is followed by S, the market may be progressing from an early risk alert to a confirmed bearish structure.

当 eS 之后出现 S 时，市场可能正在从早期风险预警进入看空结构确认阶段。

5. Darrius Mutant System

5. Darrius Mutant 资金动能系统

Green bars above the zero line represent upward trading momentum and generally indicate net capital inflow / bullish momentum.

零轴以上的绿色柱体代表向上的交易动能，通常表示主力资金净流入 / 看多动能。

Red bars below the zero line represent downward trading momentum and generally indicate net capital outflow / bearish momentum.

零轴以下的红色柱体代表向下的交易动能，通常表示主力资金净流出 / 看空动能。

In the Ranking Engine, UP means that the current Mutant momentum direction is upward.

在 Ranking Engine 中，UP 表示当前 Mutant 资金 / 交易动能方向向上。

6. Market Pulse Sentiment System

6. Market Pulse 市场情绪系统

Market Pulse measures overall market sentiment on a scale from 0 to 100.

Market Pulse 用于衡量市场整体情绪，指数范围为 0 至 100。

Bullish means bullish sentiment; Bearish means bearish sentiment; Neutral means neutral or wait-and-see sentiment.
Bullish 表示看多；Bearish 表示看空；Neutral 表示中性或观望。

Market Pulse is a sentiment dimension and should not be treated as a standalone trading instruction.
Market Pulse 是市场情绪维度，不应被单独视为交易指令。

The three systems mentioned above should be interpreted together.

Greater logical alignment among them generally provides stronger structural confirmation.

上述三大系统应结合使用。

三者在逻辑上越一致，通常意味着市场结构确认度越高。

7. Three-Dimensional Validation

7. 三维度验证

A bullish structure may be supported when Price Inflection shows eB/B, Mutant momentum is upward, and Market Pulse is bullish.

当 Price Inflection 出现 eB/B、Mutant 动能向上、Market Pulse 偏多时，可作为看多结构的综合参考。

A bearish structure may be supported when Price Inflection shows eS/S, Mutant momentum is downward, and Market Pulse is bearish.

当 Price Inflection 出现 eS/S、Mutant 动能向下、Market Pulse 偏空时，可作为看空结构的综合参考。
